SAFETY INFORMATION

READ AND SAVE THESE INSTRUCTIONS

Please read and understand this entire manual before attempting to assemble, operate or install the product.

• When using an existing outlet box, be sure the box is securely attached to the building structure and can support the full weight of the fan, so as to avoid potential serious injury or death.
• All wiring must be in accordance with the National Electrical Code “ANSI/NFPA 70-1999” and local electrical codes. Electrical installation should be performed by a qualified licensed electrician.
• Do not use bulbs having a wattage greater than the maximum value stated on the fixture and in this manual. Using a higher wattage bulb than specified will increase fixture temperature and cause risk of fire. Disconnect the electrical supply circuit to the fan before installing light kit.
• Electrical diagrams are for reference only.
• The net weight of this fan including the light kit is: 13.6 lbs.

WARNING

ELECTRIC SHOCK HAZARD
To reduce the risk of electric shock, do not use this fan with any solid-state speed control device.

ELECTRIC SHOCK HAZARD
To reduce the risk of electric shock, make sure electricity has been turned off at the circuit breaker or fuse box before beginning installation.

PERSONAL INJURY HAZARD
Reduce the risk of personal injury, do not bend the blade brackets when installing the brackets, balancing the blades, or cleaning the fan. Do not insert foreign objects in between rotating fan blades.

FIRE, ELECTRIC SHOCK OR PERSONAL INJURY HAZARD
To reduce the risk of fire, electric shock, or personal injury, mount to outlet box marked “ACCEPTABLE FOR FAN SUPPORT OF 15.9 KG OR LESS” and use mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.

CAUTION

PERSONAL INJURY HAZARD
To reduce the risk of injury to persons, install fan so that the blade is at least 7 ft. above the floor.

PREPARATION

Before beginning assembly of product, make sure all parts are present. Compare parts with package contents list and hardware contents list. If any part is missing or damaged, do not attempt to assemble the product.

Estimated Assembly Time: 45 minutes

Tools Required for Assembly (not included): Phillips screwdriver, step ladder, electrical tape, pliers, wire cutter, wire stripper.
1. Determine mounting method to use.
   A - Downrod Mount (normal or angled ceiling)
   B - Closemount (normal ceiling only)

   **Important:** If using the angle mount, check to make sure the ceiling angle is not steeper than 20°.

2. Remove three mounting screws (O) from the underside of the motor housing (G). Discard the three rubbers and the three screws (O).

3. Remove the mounting bracket (A) from the canopy (B) by loosening the four screws on the top of the canopy (B). Remove the two non-slotted screws and save, then loosen the slotted screws. This will enable you to remove the mounting bracket (A).

4. Install the mounting bracket (A) to the outlet box (not included), sliding the mounting bracket (A) over the two outlet box screws (not included). Securely tighten the two outlet box screws.

   **IMPORTANT:** If using the angle mount, make sure open end of mounting bracket (A) is installed facing the ceiling.

   Follow mounting instructions for “Downrod Style Fan Mounting” or “Closemount Style Fan Mounting” depending on mounting method (A or B) chosen in Step 1 on previous page.

**DOWNROD STYLE FAN MOUNTING**

1. Remove pin and clip from downrod assembly (D) and save.

2. Insert downrod assembly (D) through canopy (B), canopy cover (C). Thread wires from the motor housing assembly (G) through downrod (D).
DOWNROD STYLE FAN MOUNTING

3. Loosen the two set screws from the yoke on the top of the motor housing (G). Slip downrod assembly (D) into housing yoke, aligning holes in downrod assembly (D) and yoke. Insert the pin through yoke and downrod assembly (D). Insert clip into pin until it snaps into place. Tighten set screws.

4. Install hanger ball on the top of downrod (D) into mounting bracket (A) opening. Rotate fan until slot on hanger ball engages the tab on the mounting bracket (A).

Warning: Be carefully when aligning the tab to the slot! If not fully engaged, there is a possibility of fan falling, which may result in serious injury or death.

You may now proceed to the WIRING section on page 10.

CLOSEMOUNT STYLE FAN MOUNTING

1. Remove the canopy cover (C) from the bottom of the canopy (B).

2. Remove every other screw from the top of motor housing (G) and save.

3. Place the rubber gasket (EE) over the remaining screws. Pull wires through hole in canopy (B), and attach canopy (B) to motor housing (G). Align the mounting holes with the holes in the motor and fasten using the three screws removed in previous step. Tighten the screws securely.

4. Hang the fan on the hook on the mounting bracket (A) using one of the non-slotted holes in the canopy (B).
1. Connect the BLACK and BLUE wires from fan to the house BLACK wire. Connect the WHITE wire from fan to the house WHITE wire. Connect all GROUNDED (GREEN) wires together from fan to the house GREEN/GROUNDED wire. **Note:** Black wire is hot power for fan. Blue wire is hot power for light kit. White wire is common for fan and light kit. Green wire is grounded wire. If house wires are different colors than referred to above, stop immediately. It is recommended a professional electrician to determine proper wiring.

2. To connect wires, twist wire ends together and screw wire with wire connectors (AA) on in a clockwise direction. Tape the wire connectors (AA) and wires together. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and the ungrounded conductor on the other side of the outlet box. Be sure no bare wire or wire strands are visible after making connection. Place green and white connections on opposite side of box from the black and blue connections. The splices should be turned upward and pushed carefully up into the outlet box.

**FINAL INSTALLATION**

If you installed the fan with “Closemount Style Fan Mounting”, continue to Steps 1~2. If you installed the fan with “Downrod Style Fan Mounting”, skip to Step 3.

1. Remove the fan from the hook on the mounting bracket (A). Align the locking slots of the canopy (B) with the two screws in the mounting bracket (A). Push up to engage the slots and turn clockwise to lock in place. Immediately tighten the two screws firmly.

2. Install the two screws that were removed in previous step and tighten securely.

You may now proceed to the Step 4.

3. Directly align the locking slots of the canopy (B) with the two screws in the mounting bracket (A). Push up to engage the slots and turn clockwise to lock in place. Immediately tighten the two screws firmly. Install the two screws that were removed in previous step and tighten securely.

4. Attach a blade (F) to a blade bracket (E) using the blade screw (DD).

5. Fasten the blade bracket (E) to the motor by inserting the alignment post into the slot on the bottom of the motor housing (G) and tightening the blade bracket screws with washers. Please note that the blade bracket screws with washers are pre-installed into the blade bracket (E). Repeat the step for the remaining blade brackets (E).

6. Remove the three screws from the switch housing cover (I).

If you wish to use the fan WITHOUT the light kit, continue to Step 7. If you wish to use the fan WITH light kit, skip to Step 8.

7. Attach the switch housing cover (I) to the switch housing (H). Align holes in switch housing cover (I) with holes on outer edge of the switch housing (H). (Note: The wide gap in the edge of the switch housing cover (I) should align with reverse switch on the switch housing (H).) Re-insert screws and secure all screws. Add fan pull chain extension (BB). If using fan WITHOUT the light kit, assembly is complete.

8. Remove the plug from the center hole in the switch housing cover (I).

9. Remove the hex nut from the light kit (J).

10. Insert the black and white wires from the light kit (J) through the center hole in the switch housing cover (I). Hold wires taut while installing switch housing cover (I) to prevent the wire from twisting. Tighten the light kit (J) onto the switch housing cover (I). Install the hex nut removed in Step 9.

**FINAL INSTALLATION**

11. Connect the white wire from the light kit (J) to the white wire from the switch housing (H). Connect the black wire from the light kit (J) to the blue wire from the switch housing (H). Make sure the wire connectors are secure.

Warning: To avoid possible fire or shock, the connectors should not be removed unless a light kit will be immediately installed and power should be turned off prior to the removal of the light kit.

12. Attach the switch housing cover (I) to the switch housing (H). Align holes in switch housing cover (I) with holes on outer edge of the switch housing (H) (Note: The wide gap in the edge of the switch housing cover (I) should align with reverse switch on the switch housing (H)). Re-insert screws and secure all screws.

13. Install bulbs (N) into sockets. Note: This fan has an energy-saving wattage limiter included. If you replace the candelabra-base bulbs with over 190 watts, the light will automatically turn off. Please ensure the bulb wattage is always below 190 watts.

**OPERATING INSTRUCTIONS**

**PULL CHAIN:** The fan pull chain is for motor speed control: High, Medium, Low and Off. Pull the chain once for each position.

**REVERSE SWITCH:**
When the season changes, you may want to change to the direction your fan spins. To switch between clockwise and counterclockwise rotation, flip the fan reversal switch. Note: Wait for fan to stop before reversing the switch.

A. In cooler weather, clockwise rotation creates an upward air flow, which moves hot air from the ceiling into the room. Push the switch UP and see a Snowflake icon.

B. In warmer weather, counterclockwise rotation creates a downward air flow, which cools the air. Push the switch DOWN and see a Sun icon.

14. Remove the rubber washer, hex nut, bowl cap (L) and finial (M) from the light kit (J).

15. Place glass bowl (K) on pipe until flush against metal disk.
Thread the fan pull chain through the side hole of the glass bowl (K), making sure pull chain hangs clear and is not tangled in the light kit (J) socket. Thread light kit pull chain through the center hole of the glass bowl (K). Place rubber washer and hex nut removed in Step 14 onto the pipe and tighten securely. Pass the fan pull chain through the side hole of the bowl cap (L). Then place the bowl cap (L) and finial (M) over the pipe and tighten securely. Attach the fan pull chain extension (BB) and light kit pull chain extension (CC). Note: The side hole of the glass bowl (K), the side hole of the bowl cap (L) and the three-speed adjustable switch on the switch housing (H) should be in alignment; if not, the fan pull chain will be stuck and the fan won’t work.
CARE AND MAINTENANCE

• To reduce the risk of fire, electric shock or injury to persons, care and maintain this fan.

• Important: Shut off main power supply before beginning any maintenance.

• Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.

• Clean fan housing with only a soft brush or lint-free cloth to avoid scratching the finish. Clean blades with a lint-free cloth. You may occasionally apply a light coat of furniture polish to bladess for added protection.

• At least twice each year, tighten all screws and lower canopy to check mounting bracket screws and downrod assembly.

TROUBLESHOOTING

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>POSSIBLE CAUSE</th>
<th>CORRECTIVE ACTION</th>
</tr>
</thead>
</table>
| Fan does not move. | 1. Chain switch is “off”.  
2. Faulty wire connection.  
2. Turn power off. Loosen canopy, check all connections.  
3. Push switch firmly either way. |
| Noisy operation. | 1. Blades are loose.  
2. Cracked blade.  
3. Unapproved speed control. | 1. Tighten all blade screws.  
2. Replace blades (call customer service).  
3. Replace with an approved speed control device. |
| Excessive wobbling | 1. Blades are loose.  
2. Blade brackets incorrectly attached.  
3. Unbalanced blades.  
4. Fan not securely mounted.  
5. Fan too close to vaulted ceiling. | 1. Tighten all blade screws.  
2. Reinstall blade brackets.  
3. Switch with blade from opposite side.  
4. Turn power off. Carefully loosen canopy; remount securely.  
5. Lower fan or move it to another location. |

WARRANTY

The manufacturer warrants this fan to be free from defects in workmanship and material present at time of shipment from the factory for lifetime limited from the date of purchase. This warranty applies only to the original purchaser. The manufacturer agrees to correct such defect at no charge or at our option replace the ceiling fan with a comparable or superior model.

To obtain warranty service, present a copy of your sales receipt as proof of purchase. All cost of removal and reinstallation are the expressed responsibility of the purchaser. Any damage to the ceiling fan by accident, misuse or improper installation, or by affixing accessories not produced by the manufacturer of the fan, are at the purchaser’s own responsibility. The manufacturer assumes no responsibility whatsoever for fan installation during the lifetime limited warranty. Any service performed by an unauthorized person will render the warranty invalid.

Due to varying climatic conditions, this warranty does not cover changes in brass finish, rusting, pitting, tarnishing, corroding or peeling. Brass finish fans maintain their beauty when protected from varying weather conditions. Any glass provided with this fan is not covered by the warranty.

The duration of any implied warranty which cannot be disclaimed is limited to the lifetime limited period as specified in our warranty. The manufacturer shall not be liable for incidental, consequential or special damages arising at or in connection with product use or performance except as may otherwise be accorded by law. This warranty gives you specific legal rights and you also have other rights which vary from state to state. This warranty supersedes all prior warranties.

Note: A small amount of “wobble” is normal and should not be considered a defect.
